

NEW!

Toddler Village

Sized and shaped specifically for toddler bodies and imaginations, our Toddler Village system lets teachers create a dream village in the classroom. It invites a wonderful range of toddler-appropriate play, from dress-up to large motor action to quiet time in cozy nooks.

Units lock together securely, yet are rearranged in seconds to create new environments. And open visibility makes supervision easy—without disrupting village life.

The Toddler Village design is based on months of observation and testing to make it developmentally appropriate for toddlers. What could beat parallel play with a friend under the fringed canopy?

The Toddler Village facilitates the kind of play needed by toddlers. They love to explore, discover, and learn about the world. The toddler-size materials of the Toddler Village let them try things on their own and feel good about their accomplishments. A perfect way to build on their natural curiosity!

—**Tovah Klein**, Director
Barnard College Center for Toddler Development
New York, NY

In and out, up and over... and over, and over! That's how toddlers learn and build large motor skills. They get plenty of practice on the Toddler Village Risers. You saw them here first!

“...lets you create endless configurations.
Just rearrange the pieces as creativity
and imagination grow!”

– **Peggy R. Hunt**, Education Coordinator
Bright Horizon's Family Solutions
Raritan, NJ

Kitchen Corner (C910)

This is every toddler's **dream kitchen**, where 18" counters, smooth inviting surfaces and 'real' clicking knobs feel just right to busy cooks.

Toddler Village units can be easily rearranged in seconds, providing endless new environments to explore.

Connectability

Toddler-proof yet teacher-friendly, Toddler Village connectors ensure security, stability and easy reconfiguration. Each Toddler Village item comes with one connector.

Connectability

Toddler-proof yet teacher-friendly, Toddler Village connectors ensure security, stability and easy reconfiguration. Each Toddler Village item comes with one connector.

Drop a toy in the fridge's top porthole, and it appears in the window below. It's object permanence 101 (**but mostly it's just fun!**)

Whether a loose toy or attached to a unit, our transparent Chute is **a toddler favorite.**
