

SCS does hereby certify that an independent assessment has been conducted on behalf of:

Community Playthings

Maple Ridge, 10 Hellbrook Lane, Ulster Park, NY, USA

For the following product(s):

Classroom Storage:

Lockers, Changing Tables, Montessorri Shelving Units, Baby Shelf, Island Shelves, Locking Shelves, and Woodcrest Kitchen products

This product meets all of the necessary qualifications to be certified for the following claim:

Indoor Advantage™ Gold

Indoor Air Quality Certified to SCSEC10.2-2007

Conforms to California Specification 01350 for classroom scenario

Registration # SCS-IAQ-01872

Valid from: 2/20/2010 to 2/19/2011

Model Parameters

Maximum Emission Concentration for Classroom Workstations

| | CHPS EQ 2.2, 2009 DRAFT EDITION |
|-------------------------------------|--|
| Compound | CLASSROOM |
| TVOC | $\leq 500 \text{ ug/m}^3$ |
| FORMALDEHYDE | $\leq 16.5 \text{ ug/m}^3$ |
| TOTAL ALDEHYDE | $\leq 100 \text{ PPB}$ |
| 4-PHENYLCYCLOHEXANE | $\leq 0.0065 \text{ mg/m}^3$ |
| ACETALDEHYDE | $\leq 70 \text{ ug/m}^3$ |
| Individual VOCS (PUPIL WORKSTATION) | $\leq 1/2 \text{ CREL ug/m}^3$ |

CA/DHS/EHLB/R-174, 7/15/04: CA 01350, Classroom Pupil Workstation

| Parameter | Unit of Measure | Parameter Value |
|-------------------------------------|------------------------|-----------------|
| Office Dimensions & Area | | |
| Room Volume | m^3 | 231 |
| Ventilation Rate | m^3/hr | 187 |
| Total Pupil Workstation Units | unit | 27 |

California Specification 01350, Section 3.10.2.1 allows for building concentrations to be calculated on a case-by-case basis using input parameters for the amount of installed products, the size of space and air change rate. Per this guidance and 2008 data of furniture installations completed by Community Playthings (CP), furniture loading parameters were based on a CP recommended "Pre-School Room". The Pre-School Room featured the most furniture loading potential and comparable floor area as specified in CA 01350 for the School Classroom Scenario (Section 4.2.4). The Collaborative for High Performance Schools (CHPS) modeling parameter for Classroom Pupil Workstations was used to predict the classroom concentration. In the case of CP, a single workstation was defined as the maximum surface area of furniture in a typical "Pre-School Room" per individual student. A maximum number of 27 workstations were used in the modeling scenario, per CA 01350 and CHPS parameters. The maximum surface area for each classroom component (storage, panels, and worksurfaces) were calculated using the guidance of ANSI/BIFMA M7.1-2007 for individual furniture components.

Community Playthings recommended room plans can be reviewed at www.communityplaythings.com/resources/articles/RoomPlanning/SampleClassrooms.
