

Room Planning Templates

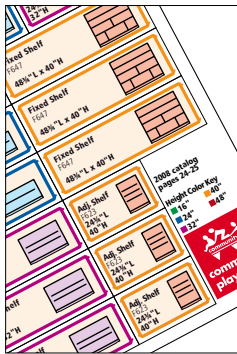

Community Playthings Planning Templates

Grab your scissors and tape! It's not a collage, but these Planning Templates can help you decide which items to choose and where to put them in your room. You'll find all our catalog products except the small items like transportation toys.

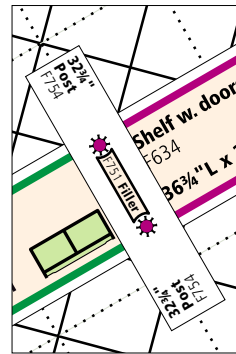

But wait. If you have a start-up or renovation on your hands, don't mess around with scissors. Give us a call. We have other options for center planning.

Roomscapes is a unique set of connectable shelves and panels, modular in length, height and angle. You can also use the shelves as stand-alone units. For more on Roomscapes, see our catalog or call customer service.

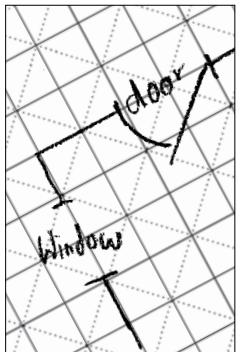

The grid on page 4 is a guide to make sure everything fits, and help you properly connect Roomscapes at 90° and 45° angles. The scale is 24:1 (1/2" = 1 foot).

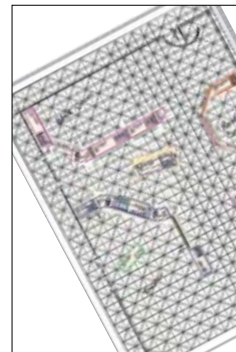

1. Roomscapes Shelf, Panel, and Post templates are color coded for heights: 16", 24", 32", 40", and 48". Read 'How to Roomscape' (next page) before planning with this connectable system.

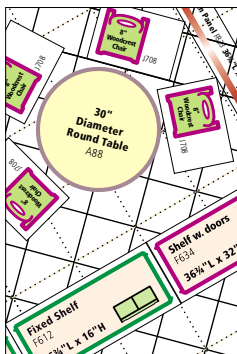

4. Tape or plasti-tac the templates where you want them. Remember to leave enough room for traffic and activities. If Posts are being used, Roomscapes shelves and panels should be connected at the black lines to allow correct spacing. Choose Posts as high as the tallest unit being connected. You can use single Posts or the template including two Posts and Filler.

2. Print one or more grids as needed and tape together (just cut off or fold blank margins). Measure your room and mark the outline on the layout grid you printed out. Locate your windows and doors, noting which way doors swing. Careful measurements are important.

5. Make a copy: When you have an arrangement you like, you may want to photocopy it for the record before rearranging the templates.

3. Print the templates you need.* Cut out along outer lines. Template sheets reference pages in the 2008 Community Playthings catalog. Choose the templates which fit the number and age of your children, and the type of activities you plan to provide.

6. Order: Using your planned layout, transfer the item names, numbers, and quantities to the worksheet. Consider using Clear, Mirror, and Chalkboard Covers on Bulletin Panels and Shelf backs. (See catalog for listings). Contact us: your customer service representative will be glad to discuss your order.

*If you want to re-use your templates, print them on Avery's removable label sheets: #6465 White Removable ID Labels, 8 1/2" x 11 www.Avery.com
When you get a new layout idea, you can just peel up the label and re-stick.

Rules for Roomscapes

1. How much space do you have?

Exact dimensions are useful.

2. How old are your children?

Think 16" for an infant divider, 24" for toddlers, and 32" for preschool. These are just suggestions for good visibility. You may prefer higher shelves near the wall, or a 48" divider to create a nap area.

3. How much storage do you need, and what do you want to store?

Shelves double as boundaries and display when they are away from the wall, and can face either direction. You'll want to place your shelves first, then fill in the gaps with panels.

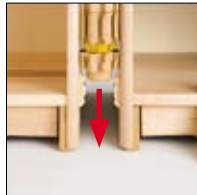

4. How do you choose Panels? There are three types: Clear (great visibility), Solid (maple), or Bulletin (for artwork display and sound absorption). Choose panel height to match your shelf height.

5. How accessible should the area be?

You can choose a gate or door to close off your divided area, or use arches to merely suggest a boundary.

6. How does Roomscapes connect?

Each shelf and panel has couplings attached to the sides, so they can be joined together in any combination using sturdy plastic posts that are 2½" wide. (Add them into your measurements.) For a safe connection, each post must be the same height as the highest component it adjoins. No tools are needed, so you can rearrange your Roomscapes whenever you want.

7. Safety and Stability:

Shelves:

- Shelves can stand alone, or be connected to other shelves or panels.
- When connecting shelves in a straight line, use 2 Posts and a Filler.

(Safety and Stability cont.)

Panels:

- Panels must be connected at both ends (i.e. no free-standing ends).
- No more than two panels in a straight line. (Options: create 45° or 90° angles, add a shelf, or use Wings, p. 35.)
- If you place panels on top of shelves or other panels to make a higher divider, the combined height should be no more than 48".

Gates and Doors need extra stability:

- They must be connected at both ends to a shelf or panel at least 24" high, or:
- One end can attach to the wall using a wall adapter and a 32" post.
- Use posts at least 32" high.

◀ Never connect panels in a straight line with a door or gate—use 45° or 90° angles.

◀ Shelves less than 3' long must be connected to a door or gate at 45° or 90°.

Beginnings and Endings:

- **Shelf:** Any shelf can end off a run.
- **Wall Adapter** can be screwed to the wall or other stable fixture so that it can support a Post. The bottom of the Wall Adapter must be on the floor.
- **Wings** come in sets of two. If you're ending a run with a panel, attach a Wing on each side, perpendicular to the panel. (p. 35)

8. Fine-tuning your space:

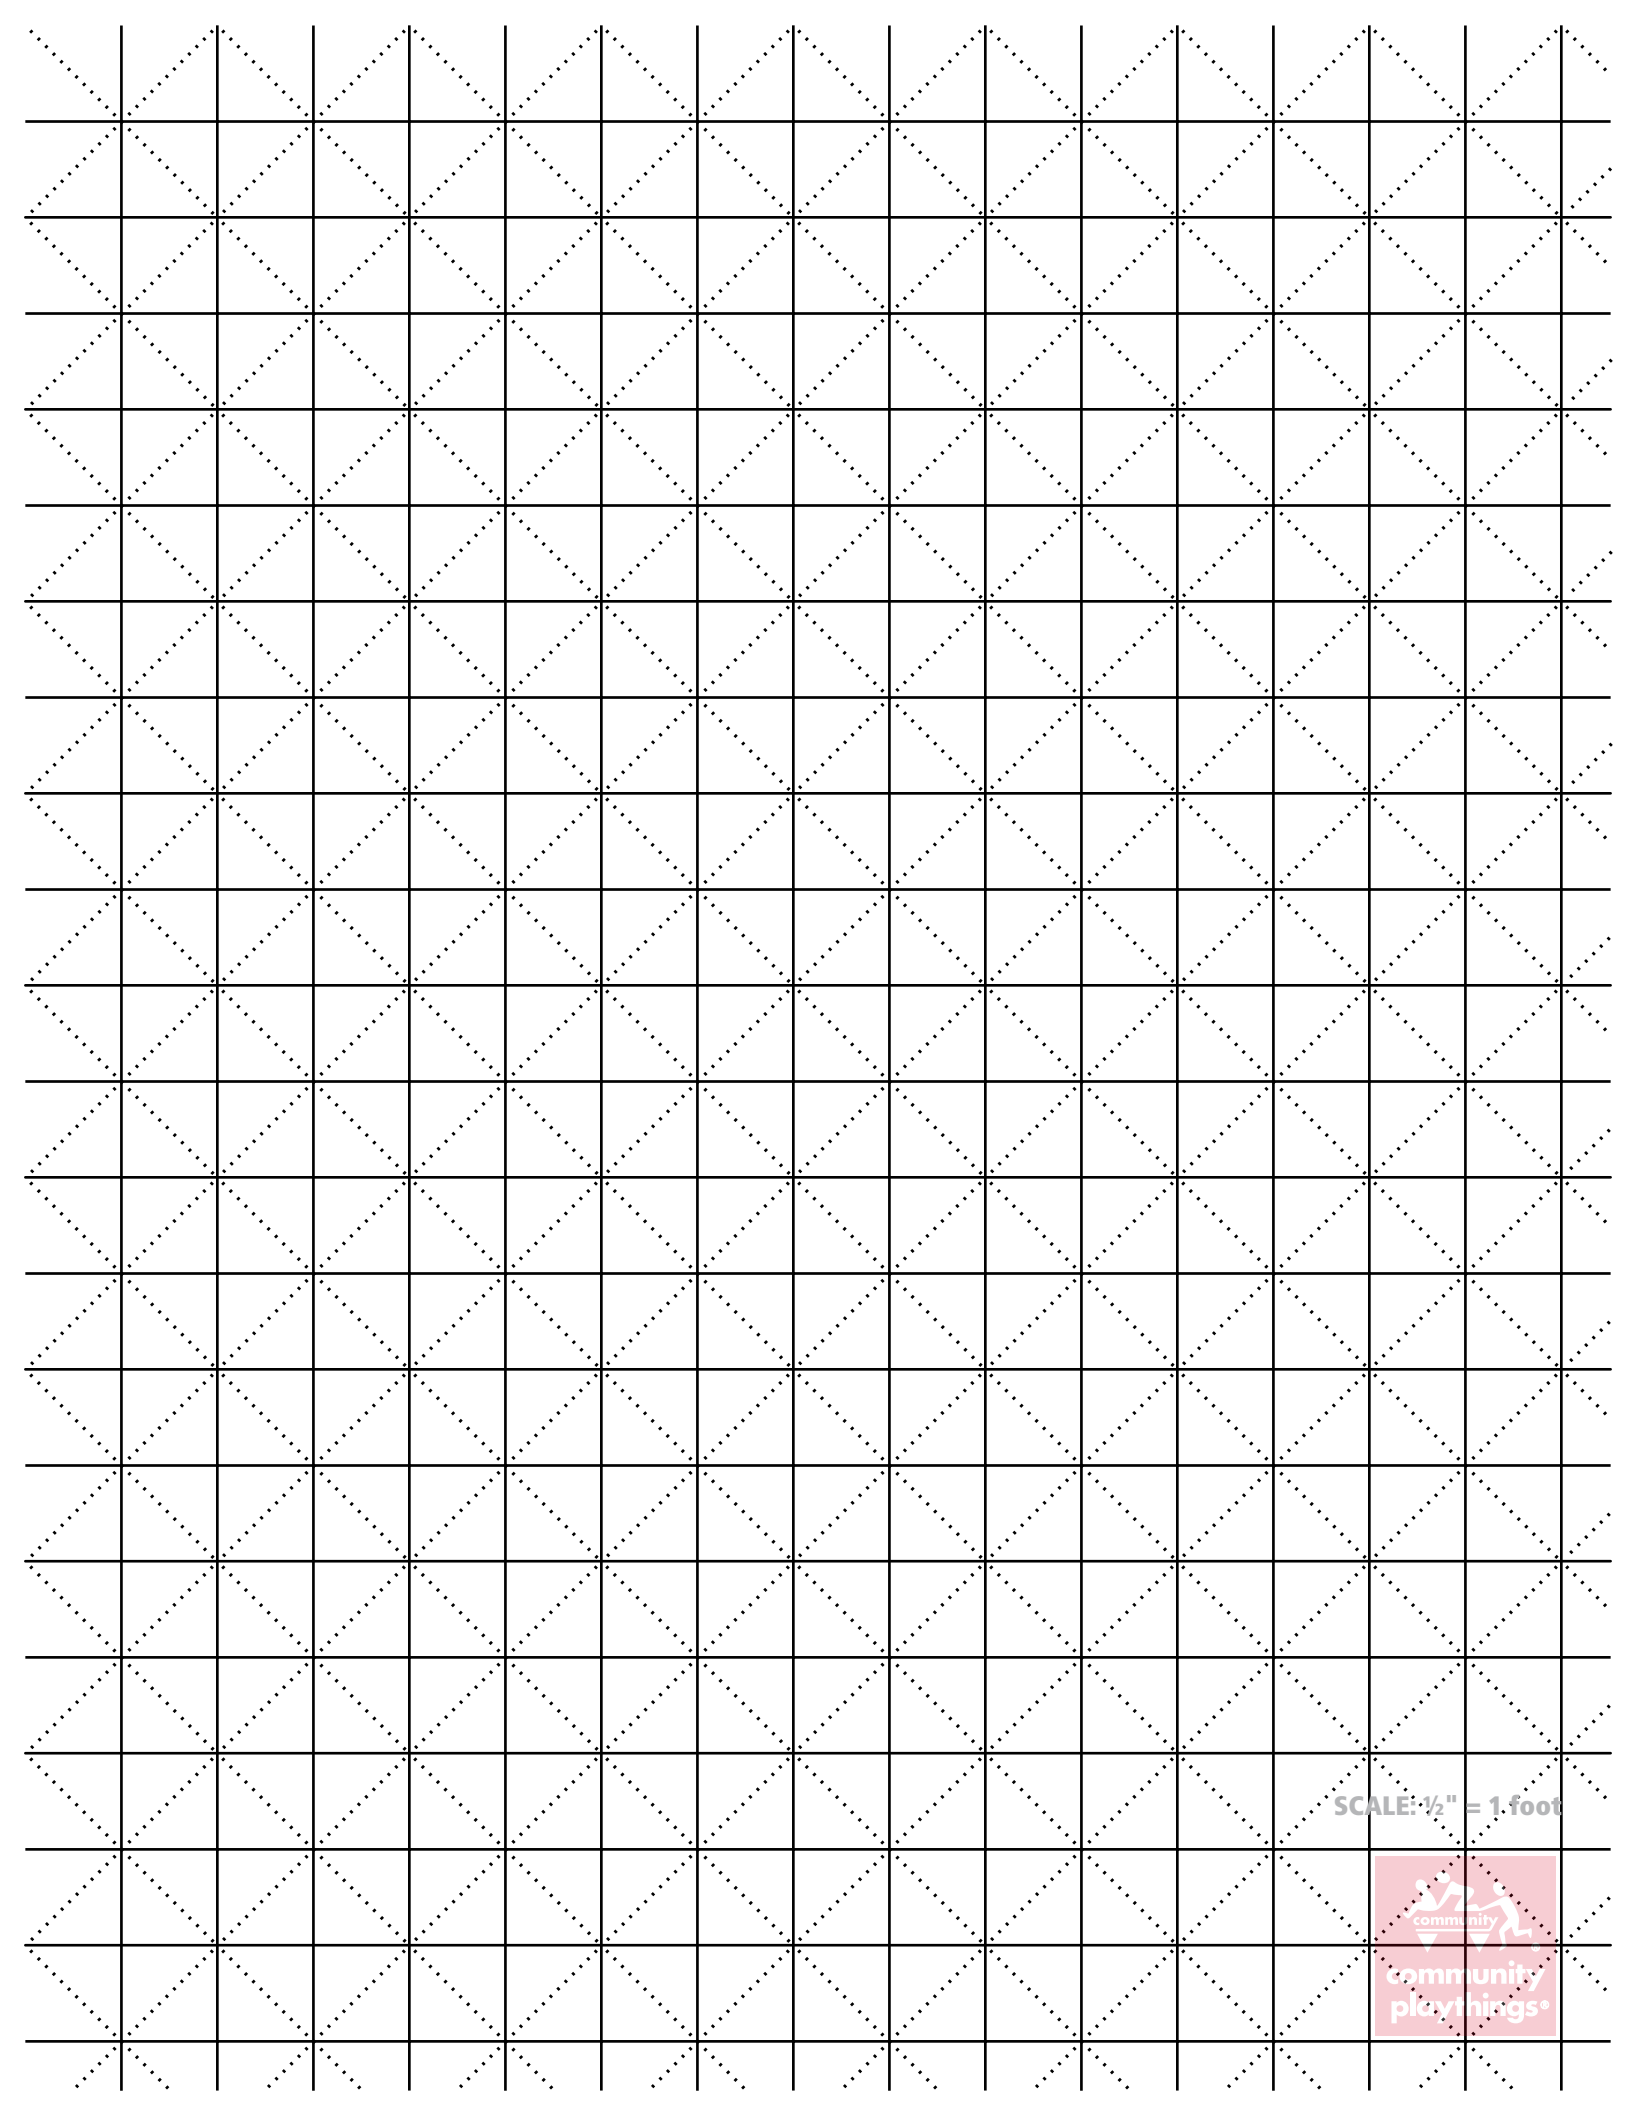

The Adjustable Panel (p. 35) can fill in any odd gaps in your Roomscapes run. It adjusts from 2' to 3' wide.
